The Action...

The Idea

- In the world where going hands-free is the fad, voice assistant is the current big thing. To stay up to date and make leverage of the trend, it is a must have.
- To extend the user base and be inclusive to handicapped and differently abled people.

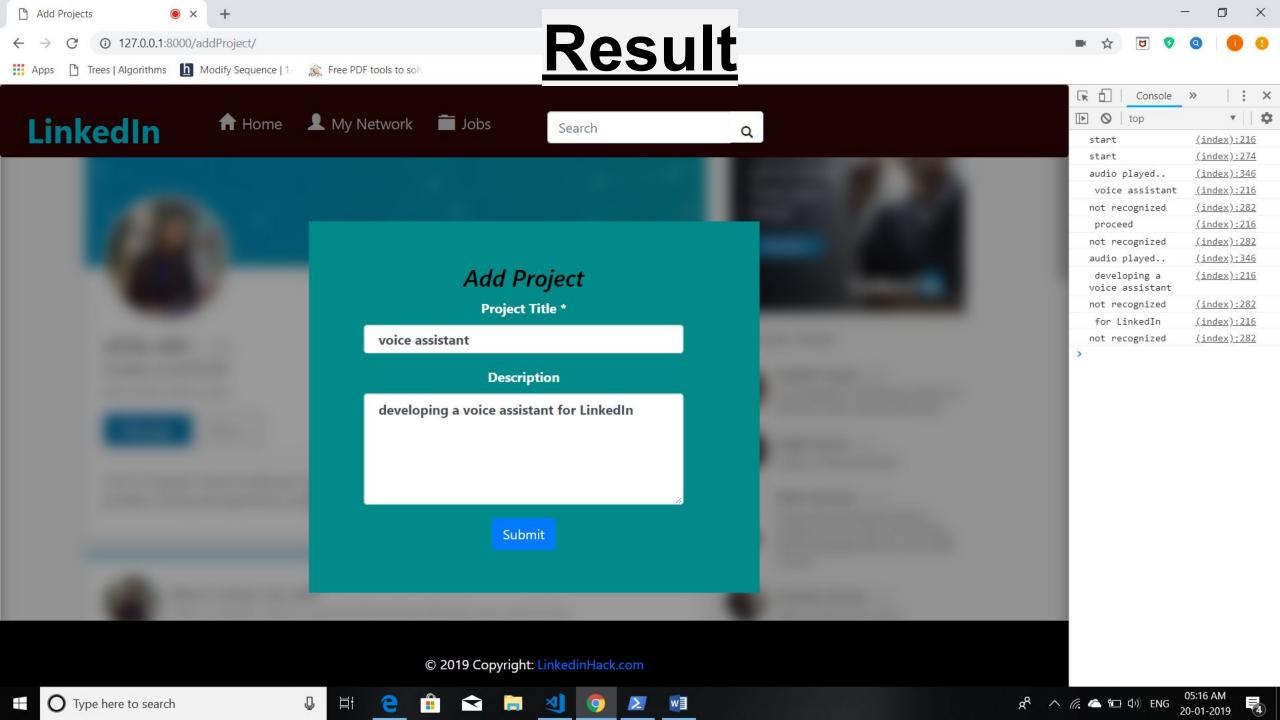

The Planning... How we thought?

Targeting the most frequent use cases:

- Using voice command only.
- Triggering words to make it completely hands free.
- → Digging to the core actions like navigating and confirmation before submission.

Future Scope

Through this tool LinkedIn will not only be able to expand user base by extending to different sections of society but also increase daily usage by enhancing customer experience and ease of use by

- Integration with Alexa, Google Home and Cortana
- Incorporation in Apple, Xiaomi and Fastrack watches
- Releasing as an extension on Google Chrome
- Unification with Microsoft outlook

Notes

- Make a copy of this deck in the same folder.
- 2. To make a copy go to file \rightarrow Make a copy \rightarrow Name the PPT in the format mention <Project Name_TeamName>
- 3. The slides are just guidelines, please feel free to add slides / other forms of communication while presenting
- 4. You may exceed the no. of slides to about 10, but more than that, could be difficult to present in the time assigned
- 5. Preliminary judging: 15 mins
- 6. You have: 7 mins for presentation + 5 mins Q&A + 3 mins Feedback

Judging criteria:

- Brilliant Idea: Impact & Innovation (up to 5 points)
- Technical Wizardry: Working Hacks, not slide decks (up to 5 points)
- The Pitch: Presentation Skills (up to 5 points)
